

7. Culturally Relevant Holistic Health Planning Information

This section contains information from the Culturally Relevant Holistic Health Planning conference that was held in December 2009 as a part of the Aboriginal Health Transition Fund Pan- Canadian Initiatives.

There are two documents in this section.

One document, a summary of a facilitator's report, briefly covers people's impressions of this conference and the main "lessons learned."

The other document is a resource that was provided by the conference organizers that one could use for community health planning activities.

This information can be shared with staff in other departments, volunteers or community members.

The documents can be sent electronically in an email or photocopied and distributed as you see fit.

Please refer to the manual that was distributed at this conference for additional material about the steps involved in culturally relevant, holistic health planning. Contact the Council of Yukon First Nations Health and Social Development Department if you would like a copy of this manual (867) 393-9240.
